

What is Garapa?

Garapa (Apuleia Leiocarpa) is often chosen by architects, builders, and homeowners for its attractive light golden color, its durability, fine grain, kiln-dried performance, and value. Also referred to as Brazilian Ash in the flooring trade, Garapa is known to slightly darken upon exposure to ultraviolet light. The result is a golden-brown hue color similar to teak that compliments any application.

The gold standard.

Tybee Island, Georgia is a retreat on the Atlantic at the mouths of the Bull and Savannah rivers on the border of South Carolina. With three miles of public beach accessible to vacationers using

35 dune crossovers, what's not to love? Well, the old pine crossovers, for one. Cracked and jacked, the mangled pine boards weren't only eyesores, they were liabilities – as pine would float off its base during storm surges.

So, when engineers decided to replace the 35 beach dune crossovers on Tybee Island, they chose Garapa Gold™. Now, not only are the crossovers gorgeous and practical ways of getting tourists to the beach, they're sturdy enough to stick around when an uninvited hurricane decides to pass on through town too.

High quality...

Garapa is beautiful. Garapa Gold™ features a rich honey golden-brown color range that will be the highlight of any landscape. For long-lasting durability, Iron Woods® only uses 100% Clear All-Heart Garapa, without any of the unsightly knots or sapwood streaks used by other suppliers. What you get with Iron Woods® Garapa Gold™ is gorgeous wood with attractive grain patterns, nothing less.

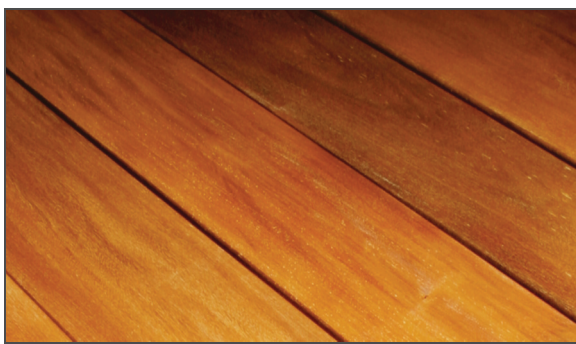

...without the high price.

Garapa Gold™ is the best lower-cost alternative to Iron Woods® Ipe decking. A durable, scratch-resistant, and low-maintenance hardwood, Garapa is virtually indistinguishable from Ipe when left to weather to a natural silvery-gray patina.

And unlike composite decking, Iron Woods® can always be restored to its original appearance, because the wood's natural beauty runs through and through.

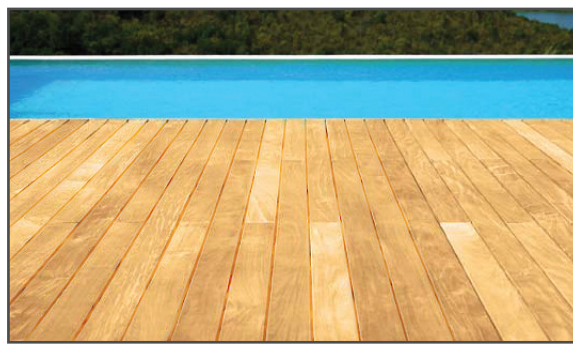

Product Solutions

Choose the right product for your project. Budget, Climate, Aesthetics and Site Conditions all impact product and profile selections.

Garapa Gold™ Decking

Garapa Gold™ Decking is available as decking and lumber in 1"x4", 1"x6", 5/4"x4", 5/4"x6", 2"x2", 2"x4" & 2"x6".

Garapa Gold™ Vanish Decking™

Don't want to see fasteners? No Problem! Iron Woods® unique Vanish Decking™ profile provides an exterior hardwood floor appearance. Available in 5/4"x4" and 5/4"x6".

The Difference is in the Grade – We Set the Standard

Garapa, like any other species of wood, is produced to different grade and quality standards. In the absence of official grading rules for hardwood decking, Iron Woods® by Timber Holdings set its own standards over 40 years ago. Consumers, Architects and Building professionals recognize the Iron Woods® Premium Select Architectural Grade as the benchmark for quality and consistency.

At Timber Holdings, we believe educated consumers are our best customers, so we provide them all of the information they need to make their own decisions and helpful tips about how to care for their decks. To learn more about our products and what sets Iron Woods® apart from the rest, please visit us at www.ironwoods.com.
