TRU&MODERN COLLECTION

# EXCEPTIONAL DOORS FOR THE MODERN INTERIOR

Creating a modern home is one of the most exacting architectural styles to achieve. When distilling a home to its simplest form, doors play a critical role in the interior design. We created our Tru&Modern Collection with this in mind.

From simple to bold, we offer the broadest line of made-to-order, handcrafted, modern doors so you can capture your exact vision.

# FLUSH CONSTRUCTED DOORS

Detailed information on TruStile flush doors is available in our *Flush Door Specification Guide*. Download for free:

[www.trustile.com/flush-guide](http://www.trustile.com/flush-guide)

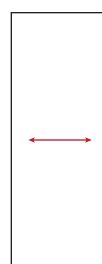

## Flush Doors

### TRU&MODERN FLUSH (TMF SERIES)

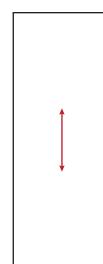

All other flush doors just don't deliver the refinement required for today's modern interior. TruStile flush wood doors feature  $\frac{1}{16}$ " thick hand-selected veneers, precision-matched to optimize the beautiful character found across each species of natural wood.

- Hand-matched  $\frac{1}{16}$ " veneers are available in both horizontal and vertical grain (wood doors only)
- A highly engineered core provides stability for the door, while a matching hardwood edge provides a beautiful finish
- Made to order in sizes up to 4' x 10'
- Available in stain-grade wood or paint-grade MDF

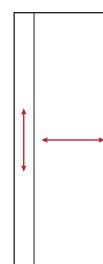

### Flush Door Styles

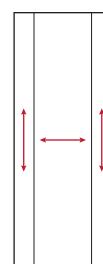

**TMF1000**  
Horizontal grain\*

**TMF1000**  
Vertical grain\*

**TMF1001**  
Wood only

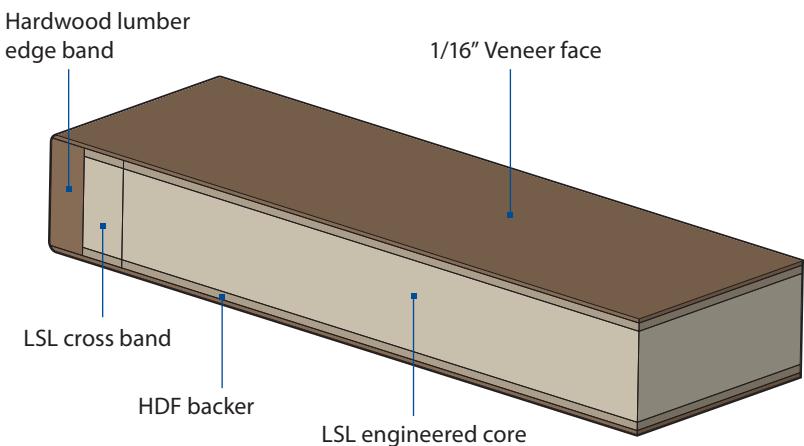

**TMF1002**  
Wood only

\* MDF doors have no grain and are not directional

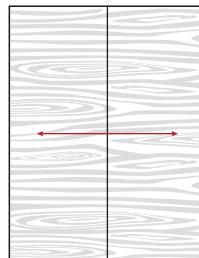

# TruStile Reserve Wood® Flush Doors

- Hand-matched  $\frac{1}{16}$ " veneers are available in both horizontal and vertical grain
- A highly engineered core provides stability for the door while the matching hardwood edge provides a beautiful finish
- Made to order in sizes up to 4' x 10'
- Available in over stain-grade wood or paint-grade MDF

## Hand-Matched Pairs

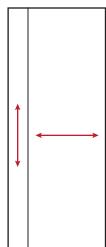

When hand-matching veneers for pairs, TruStile treats the pattern as though it was covering one extra-wide door. This creates a continuous grain pattern across the width of both doors.

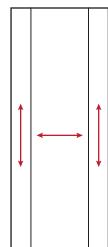

On horizontal pairs, wood grain is continuous across the face of both doors.

## Sketch Face Flush Doors

TruStile offers two sketch face door styles that combine hand-matched vertical and horizontal veneers on the same face.

TMF1001  
Wood only

TMF1002  
Wood only

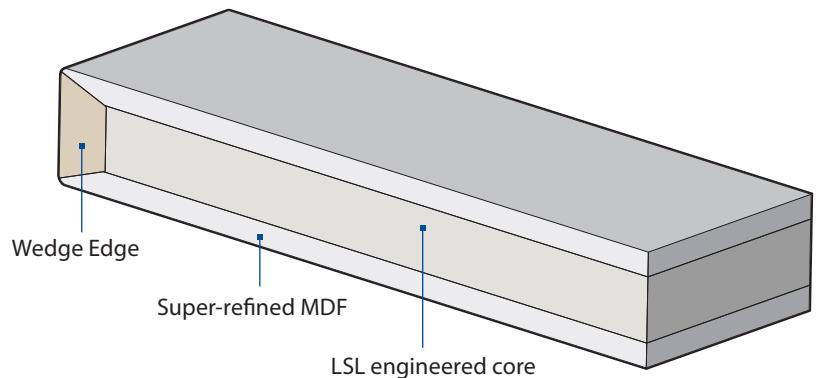

TMF1002 sketchface flush door in walnut with clear coat finish

## MDF Flush Doors

- Highest quality, super-refined MDF creates a smooth paintable surface
- A highly engineered core provides stability for the door while the Wedge Edge®, our patented hardwood edge system, provides a secure mount for hardware
- Made to order in sizes up to 4' x 10'

## STILE & RAIL CONSTRUCTED DOORS

TruStile's authentic stile and rail doors offer crisp details and design flexibility, which can't be replicated in routed or stamped doors. Each door is made to order with perfectly proportioned components, individually crafted to ensure every door is architecturally correct, regardless of size.

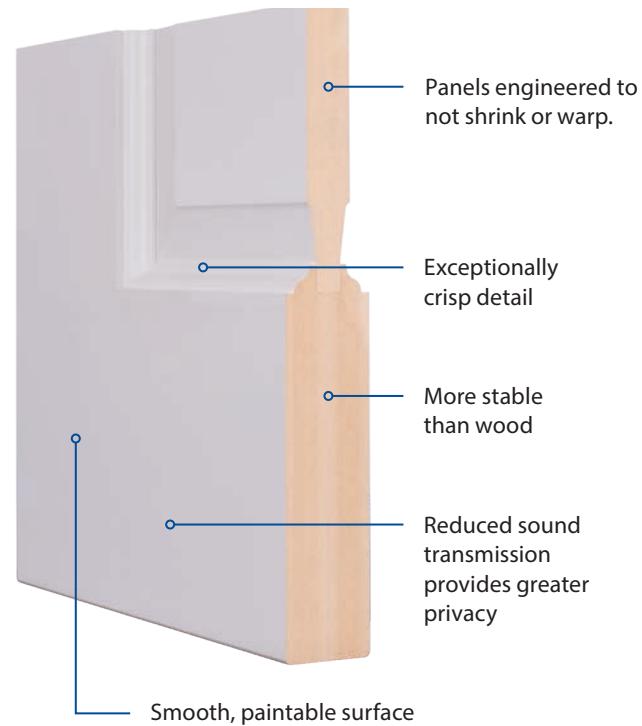

### All Doors Are Not Created Equal

The figure illustrates the timeless advantage of TruStile's authentic stile and rail construction. All door components can be customized and combined to create the door style you desire, each with crisp, architecturally-correct details.

TS1000 doors in MDF with Empire (EM) moulding and Flat (C) panel

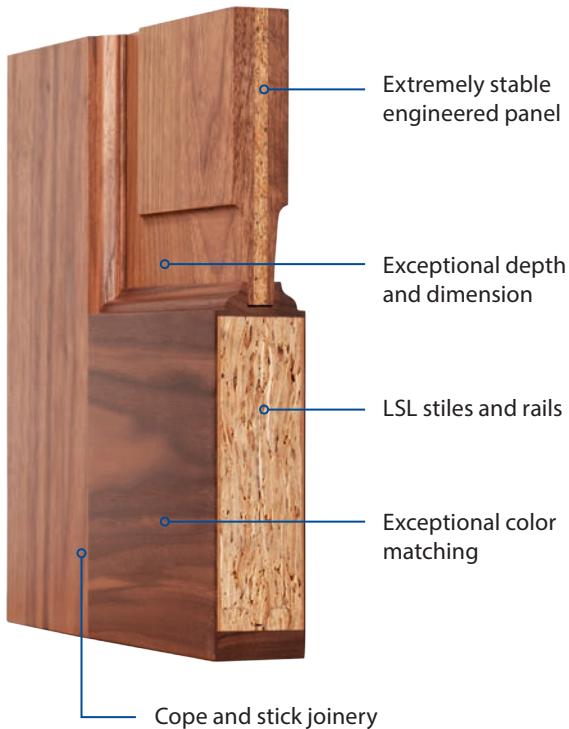

## TruStile MDF Doors

TruStile MDF Doors provide quality that is unrivaled. Our use of super-refined MDF and meticulous construction methods result in a painted door product that is a cut above the rest.

- Made with solid, super-refined MDF that provides a smoother painting surface than pine, poplar or lower-grade MDF alternatives.
- MDF is more stable than natural wood and less susceptible to movement and warping.
- More affordable than wood doors.
- Third party certified by Scientific Certification Systems to contain 63% recycled content.

### What is MDF

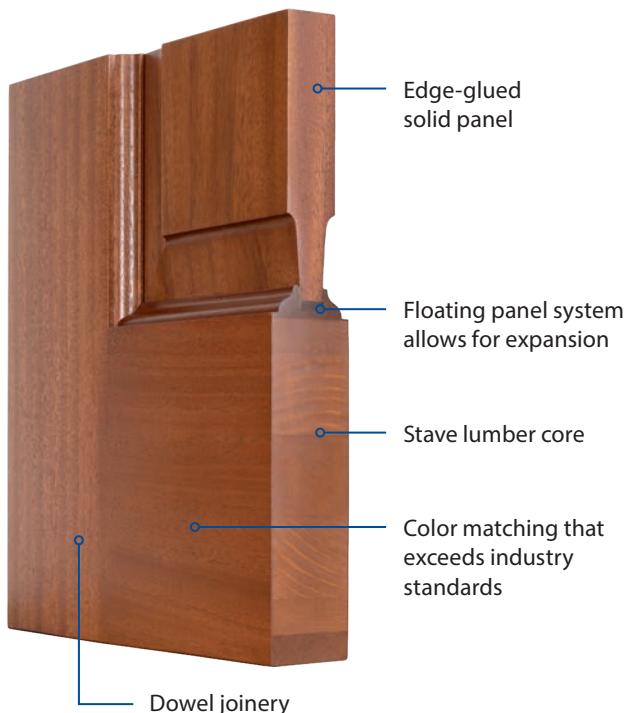

MDF is an engineered wood product made from compressed wood fibers bound together with resin. The durable and homogeneous construction of MDF resists warping, cracking and splitting and outperforms natural wood doors for painted applications.

## TruStile Reserve® Wood Doors

Designed to the highest level of quality, TruStile Reserve Wood Doors are constructed using the latest technological advances combined with meticulous hand craftsmanship.

- The TruStile Reserve series incorporates only the finest materials and construction methods.
- Engineered panel made with a composite core for strength and stability while maintaining the look of a solid wood panel construction.
- Precision-cut cope and stick joinery for a meticulous, uncompromising look.
- The strength and durability of LSL is employed for the ultimate in stiffness to resist bowing, twisting or warping.

## TruStile Wood Doors

Made in the authentic stile and rail manner, TruStile Wood Doors use a premium mix of materials that exceed industry standards for a truly natural look.

- Component parts are blended for color and grain pattern matching that exceeds industry standards.
- Edge-glued solid wood panels for a premium look and feel.
- Traditional dowel construction enhances strength and durability.
- An engineered stave lumber core is cut to size with alternating grain patterns, which balances the core and reduces wood's natural tendency to move.

# HINGES

## Simonswerk®

### TECTUS CONCEALED HINGES

Simonswerk Tectus concealed hinges offer a sleek, clean look perfect for today's modern interiors. These precision hinges are fully adjustable in three dimensions, making it simple to create a perfect margin between the door and frame.

Our concealed hinge offering is available on any of our 1-3/4" or 2-1/4" thick doors and provides a complete solution: precision-machined door, fully prepped ready-to-assemble jamb and choice of Tectus hinges. Not available on pre-hung units.

## Emtek®

### SQUARE BARREL HINGES

Emtek square barrel hinges offer a unique, modern rectangular spine profile when the door is closed. With smooth action, a solid brass construction and loads of style, these hinges offer a sophisticated look and feel.

The hinge barrel also features no exposed screws for an aesthetically clean look, unlike some other options on the market.

Emtek square barrel hinges are available in 3-1/2" x 3-1/2", 4" x 4" and 4-1/2" x 4-1/2" sizes and are available in a wide variety of finishes.

Shown in US10B Oil-Rubbed Bronze finish

### Factory Pre-Hanging

Like our doors, TruStile's pre-hung units are built using premium construction techniques. Available as either pre-hung units or knock-down jambs, TruStile can supply any width and any species for any size door.

## TruStile® Hinges

### HEAVY DUTY BALL-BEARING HINGES

TruStile offers architectural-grade, square corner, ball bearing hinges custom built to its specifications.

Doors that are ordered pre-hung receive 4" hinges on 1-3/4" doors, while 1-3/8" doors receive 3-1/2" hinges.

4-1/2" hinges are available for 1-3/4" and 2-1/4" doors. Hinges can also be ordered for TruStile doors not pre-hung at the factory.

# JAMBS

## Modern Architectural Door Jambs

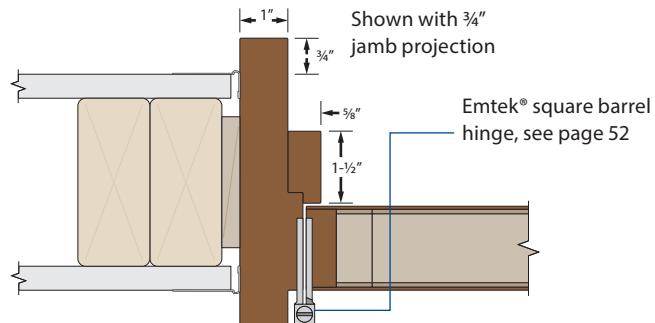

FOR TODAY'S DRYWALL TREATMENTS

The new TruStile modern casing-less door jamb configurations bring high-end, configurable designs that complete the look of modern openings in your projects. Discerning building professionals and their clients will appreciate the innovative options that create seamless lines and eliminate the need for casing around each door throughout the home.

### Projected Jamb with Inset Door

Exposed jamb edge projects from wall with inset door that is flush to wall

### Jamb detail with L-bead trim and barrel hinge

Emtek square barrel hinges look great with this modern door and jamb, but most standard barrel hinges will work too.

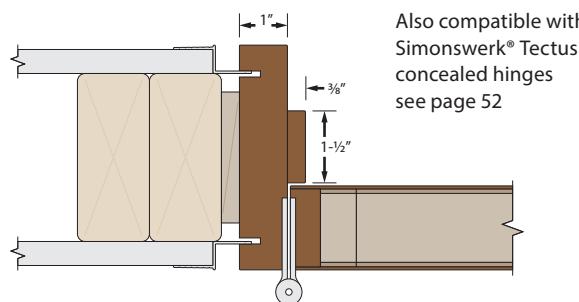

### Flush-to-Wall Jamb

Exposed jamb edge with door and jamb flush to wall

The complete TruStile jamb offering is detailed in our *Interior Residential Jambs & Accessories Specification Guide*. Download for free at:

[www.trustile.com/jamb-guide](http://www.trustile.com/jamb-guide)

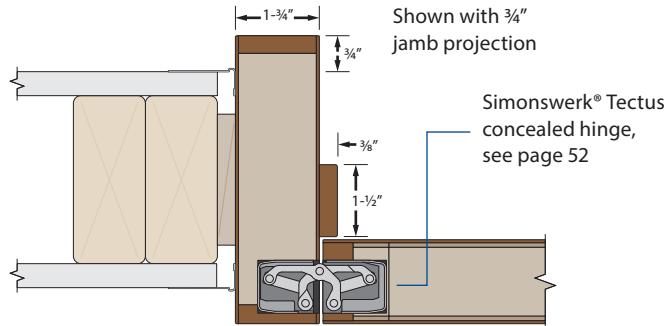

### Jamb detail with Z-reveal trim and barrel hinge

Backside kerf requires minimum 1" thickness.  
Also available in single rabbet configuration.

## Projected Jamb and Door

Exposed jamb edge projects from wall with door that sits flush to edge of jamb

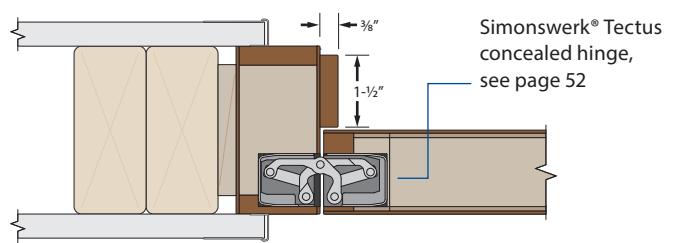

### Jamb detail with L-reveal trim and concealed hinge

Compatible with standard barrel hinges.

## Drywall Return Jamb

Semi-concealed jamb edge with door and jamb recessed in wall

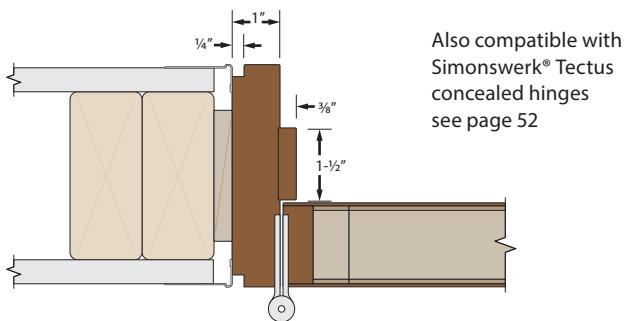

### Jamb detail of drywall return jamb with concealed hinge

Compatible with standard barrel hinges. Jamb must be installed before applying drywall

## Flush-to-Wall Jamb with Reveal

Exposed jamb edge with built-in reveal, door and jamb flush to wall

### Jamb detail with L-bead trim and barrel hinge

Also available in single rabbet configuration.

# WOOD ENTRY SYSTEMS

Make the entry to your home a most welcoming invitation with an exceptional entrance by TruStile. In collaboration with our parent company, Marvin®, we have engineered a family of premium entry systems that don't just transform a space, but how you feel inside it.

With the Reserve Wood Entry System™ and Resilient Wood Entry Systems™ you have two options that take exterior doors to the next level. The Resilient Wood Entry System sets the tone of quality for the whole home using the most durable paint-grade construction without sacrificing any design options. The Reserve Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood.

Both entry system solutions have been extensively tested and proven in partnership with the Marvin® Research and Development team.

**MARVIN**® 

For more information about our wood entry systems, to request your copy of our entry systems catalog.

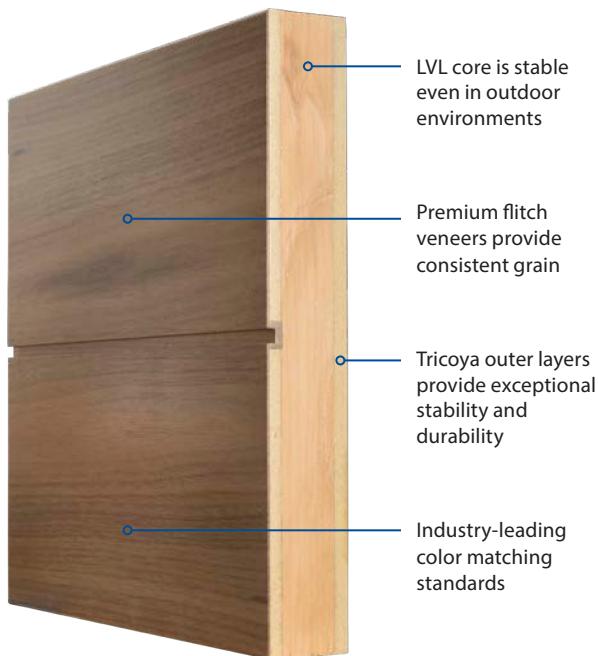

[www.trustile.com/entry](http://www.trustile.com/entry)

TruStile entry systems are solely available for residential applications.

TMIR1002-102B in walnut with Ebony finish and  $\frac{1}{4}$ " kerf cut reveals

## Reserve Wood Entry System™

The Reserve Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood.

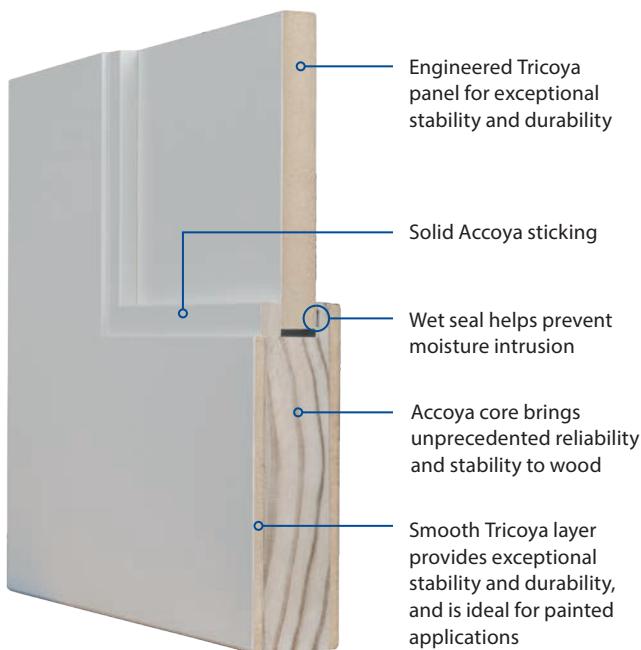

- Engineered with a laminated veneer lumber (LVL) core and Tricoya® layers to provide exceptional stability and durability.
- 10 natural wood species available with an extensive collection of premium factory stain options.
- Premium appearance standards ensure industry-leading grain and color matching.
- 5-year limited warranty with industry standard overhang requirements for both inswing and outswing units.

## Resilient Wood Entry System™

The Resilient Wood Entry System sets the tone of quality for the whole home using the most durable painted construction without sacrificing any design options.

- Engineered with resilient Accoya®, an acetylated wood product, which brings unprecedented reliability and durability to wood.
- Tricoya® top layers provide exceptional stability, durability and paintability, for outdoor applications.
- Most configurations delivered pre-hung with an Accoya built jamb and a premium prime finish, ready to paint to match your design.
- 10-year warranty with limited and no-overhang applications, depending on system design specifications, for both inswing and outswing units.

# DESIGN TOOLS

Design, Configure and Visualize Your Projects

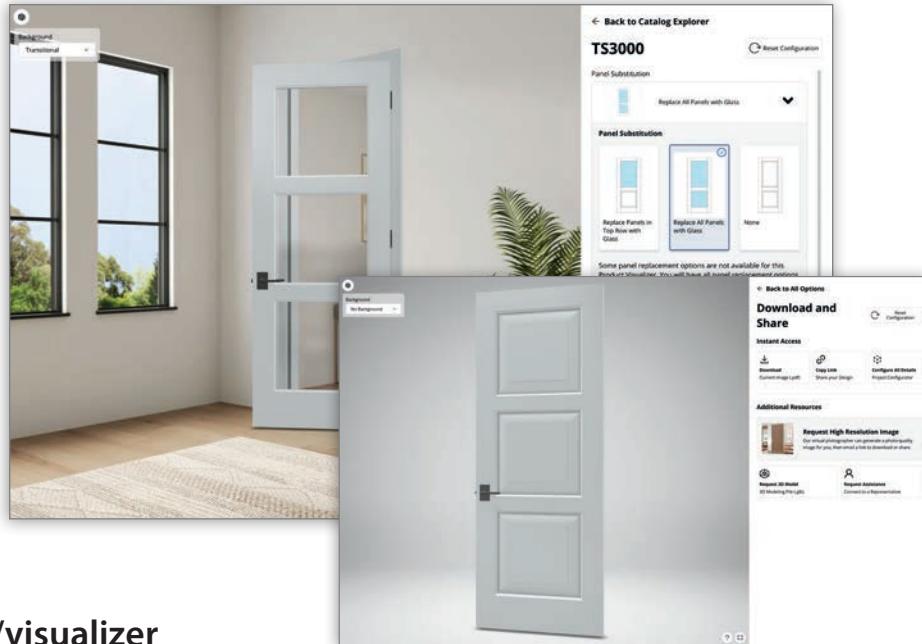

## Door Visualizer

Imagine the possibilities for your home with the TruStile Door Visualizer. Customize your door's style and materials and see changes in real-time.

Share a link to your configured door with others or download a PDF tear sheet, high resolution image or 3D model for use in modeling programs.

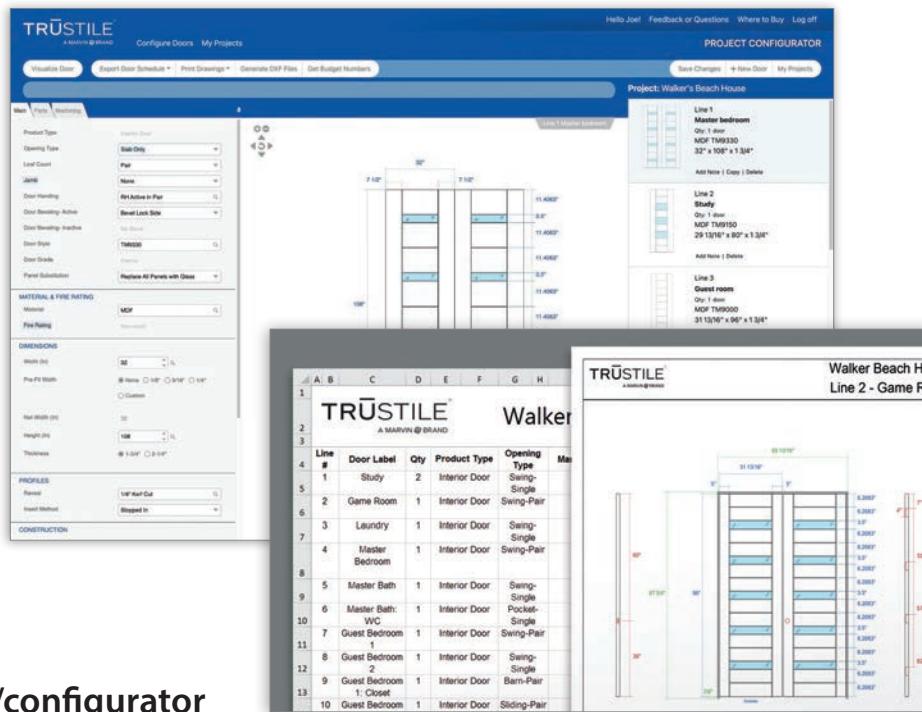

[www.trustile.com/visualizer](http://www.trustile.com/visualizer)

## Project Configurator

Design your own door package. Specify the height, width and location of all components within a door and save to a project.

Project Configurator projects can be exported as a door schedule that opens directly in Microsoft® Excel, as a PDF of drawings or CAD models to import directly into your plans.
