EVERY PIECE OF KLEER TRIM IS ALL THAT

Kleer® gives homeowners the rich, unique presence and authentic detail of real wood in a highly durable, easy-to-maintain package. Contractors love Kleer because it cuts and shapes like wood and is a cinch to install.

Requires Little. Differentiates a Lot.

Give the perfect finish to fascia, soffits, porch ceilings, wainscoting and more. Kleer was meant to create unique designs. And because it's made from durable PVC it adds unique, worry-free personality indoors and out.

Complete Any Home Design Story

The architectural details of a home represent the unique touches that make up its personality. For homeowners, Kleer® offers endless durability and low maintenance. For pros, Kleer works just like wood, because it can be nailed, stapled, glued, bent and even painted.

KLEER BENEFITS **FOR EVERYONE**

Thoroughly Workable

Kleer® Trim goes up quickly and can be used in virtually every trim application, from fascia to wainscoting. Plus it can be heat bent to create a final product that brings any design to fruition.

KLEER VS WOOD

Kleer® PVC trimboards have all the versatility, workability and design potential of wood—whether in the form of corners, fascias, soffits, rakes, casings or any other architectural embellishment. Kleer is engineered for 100% efficient usability for the pro when it comes to installation, and long life for the homeowner.

If you're sensing a "you can have it all" theme here, you're absolutely right. See all the ways Kleer is such a standout choice compared to wood.

PROTECTING OUR TRIMBOARDS

Keeping Them Clean From Factory to Jobsite

Kleer® PVC trim is engineered to look brilliant for years to come. We also make sure our trimboards stay clean all the way up to installation.

TruEDGE®

Our innovative TruEDGE design provides cleaner, smoother edges that can be easily wiped clean. The result: every piece of trim is installed for a pristine look.

KleerPak®

Our signature KleerPak comes as a prewrapped bundle, which contains further protection with individual MiniPaks™ to keep individual boards clean until they're ready to use. This also allows dealers to sell smaller quantities without leaving the remaining stock exposed to dirt and debris.

Kleer Protective Film

Kleer protective film keeps dust and dirt off trimboards and sheets to keep them clean and crisp until after they're installed. Prominent branding allows for clear identification.

Please check with Customer Service for specific product availability.

KLEER KONCEAL[®]

DETAILS

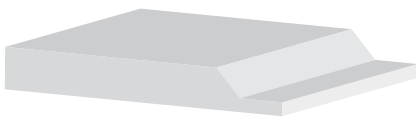

Save Time On The Jobsite

Kleer Konceal shortens installation time. They're purchased pre-made, so you don't need to lose precious hours fabricating any material on the jobsite.

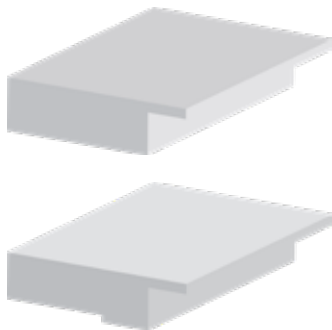

Klear Trimboard[®] with Nailing Flange Cutouts

Designed with a 1/4" cutout so they install flat over window nailing flanges for a more attractive finished product.

KLEERStart[®]

A 3/4" thick frieze board, the KLEERStart system allows siding to easily fit behind the trimboard, creating a seamless look.

with nailing flange cutout

Klear Konceal[®]

The Konceal System is an innovative system of products from Kleer designed to save builders time and frustration without sacrificing a clean, finished look. These boards and corners have a built-in 3/4" reveal that covers rough cuts at corners as well as around windows and doors where precision cuts can be challenging. Klear Konceal is available in smooth or natural woodgrain textures so you can pair it with vinyl, fiber cement or wood siding.

Kleer Konceal® Corners

A 3/4" reveal makes for easier siding installation and a clean, seamless look.

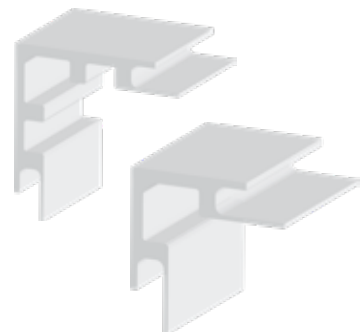

Kleer Corners®

Traditional trim corners are easy to install and offer the aesthetics of true mitered corners, in both smooth and woodgrain finish.

Outside Corner with Integrated Nailing Flange

Integrated nailing flange forms a 3/4" pocket to conceal end cuts.

GROVE Collection™

We've enriched our ceiling and soffit standout with a Nickel Gap profile and Trim Board options. So along with V-Groove and Beadboard planks, we've infused stained wood presence into an expanded Grove Collection™ lineup that tops wood in low maintenance and lasting durability.*

KLEER BEADED BOARDS

Timelessly Detailed. Beautifully Textured.

Whether you're looking to raise the profile of porch ceilings, soffits, bathrooms, laundry rooms or any other area that can use a refresh, our beaded boards expand expression with a wealth of profiles and applications.

KleerLok® Beaded Boards

This edge-and-center bead profile features a shiplap nailing flange that increases installation speed and improves the finished look.

KleerLok T-Moulding

Used for connecting end joints of 1/2" Kleer Beaded products

Edge and Center Beadboard

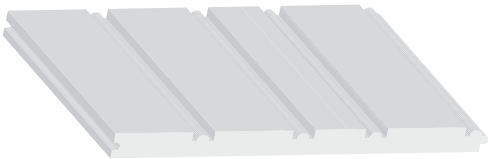

This traditional profile replicates the look of tongue and groove wood planks that's ideal for soffits and other applications.

Reverses to V-Groove

KLEERBeed® Beaded Sheets

KLEERBeed Beaded Sheets offer a finished look similar to individual boards, while their larger size makes for fast installation and a consistent surface.

2" On-Center Bead Tongue and Groove

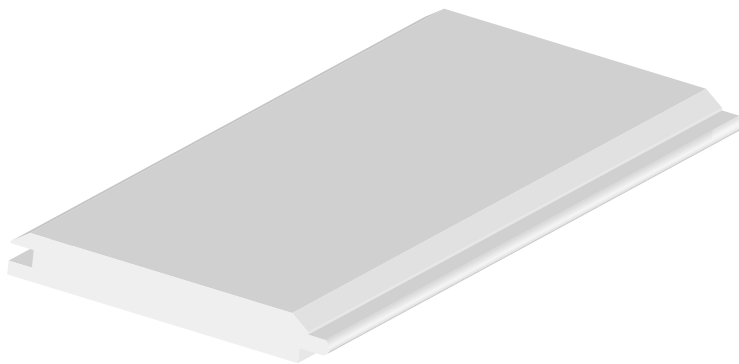

*Please check local building codes prior to using Kleer for indoor applications. Always follow local building codes and construction best practices.

NICKEL GAP / V-GROOVE PLANK

6" Reversible

Kleer® Reversible Nickel Gap/V-Groove profile adds charming and timeless detail to any home style, minus the maintenance. Suitable for both modern and traditional designs, both Nickel Gap and V-Groove panels stand out as an accent wall or work as an elegant, durable surface for high-traffic or moisture-prone interior areas.

- Clean, crisp lines deliver refined aesthetics
- Durable, low-maintenance PVC Technology
- Can be installed vertically or horizontally
- Tongue & Groove joint simplifies the installation
- Exterior application: soffit and porch ceilings*
- Waterproof and termite proof
- Paintable

*Not for exterior sidewall application

CLEARLY VERSATILE KLEER SHEETS & TRIMBOARD

Ideal for a variety of millwork applications and custom details, Klear Sheets are available in a wide range of thicknesses and sizes. Choose smooth or use the optional woodgrain finish on one side.

Klear Sheets and Trimboard offer design flexibility for every kind of application—all the distinctive beauty of wood without the upkeep or rot. And just like wood, you can nail, staple, glue, bend and paint it to create any piece of architectural millwork. Infused with UV inhibitors that provide long-lasting protection, Klear Trimboard is perfect for creating authentic accents with a look that will last for years and years.

Klear Sheets®

Available from 1/4" to 1" nominal, Klear Sheets offer the versatility for a variety of millwork applications, as well as for framing out multiple windows and other custom uses.

Klear Custom Sheets

Klear 1-1/4" Sheets are perfect for corbels, mouldings, and any custom PVC millwork.

Smooth

KLEERWRAP POST WRAPS

Amp Up Presence With Ease.

KLEERWrap® Post Wraps* add instant distinction to existing columns. And since they feature the same advanced PVC technology as our other Klear products, they're virtually impervious to moisture and insects. Even better news: they can be quickly installed by just one person using Klear PVC adhesives.

Each kit comes with two bed moulding sets. Additional bed, crown, base cap moulding and outer wrap sets are sold separately.

*Non-load bearing.

All KLEERWrap mouldings are mitered and cut to length to fit all KLEERWrap Post Wrap sizes.

Kleer Post Wraps are easy to install on both new construction and remodeling projects.

KLEER MOULDINGS

Fully Finished From Top to Bottom.

Kleer® Mouldings bring wood aesthetics and PVC protection to everything from crowns, corners and casings to wainscoting, chair rails, water tables and weather stops. Beautifully realistic patterns and textures tie together home designs inside and out. Long-lasting performance keeps it that way.

THE DIFFERENCE BETWEEN DONE AND FINISHED

Adhesives & Fasteners

Our adhesives and fasteners give every Kleer® a seamless look. Use our variety of adhesives and sealants to fill gaps and nail holes and create tight, weatherproof bonds. They're precisely formulated for use with Kleer Cellular PVC Trim products. Use our Cortex® for Kleer fastener system to make unsightly fastener heads disappear.

① **Kleer Cellular PVC Adhesive**

Two-part structural adhesive. 100% waterproof, UV stable, can be sanded and painted, and is color matched to Kleer PVC trim products. It can be used to fill nail holes and gaps up to 1/8" without the need for fasteners or biscuits.

20–25 minute work time.

Ideal for applications where a slower work time is preferred. 25ml, 50ml, and 220ml cartridges

4–7 minute work time.

50ml and 220ml cartridges

② **Kleer Structural Sealant**

A multi-purpose product. Its tenacious adhesion and elastomeric properties make it the ideal product for filling expansion gaps and filling nail holes.

It skins over quickly and can be painted in 2 hours, with a full cure time of roughly one week.

③ **Kleer Cellular PVC Nail Stick**

A two-part epoxy putty used for filling nail holes in PVC. Cures off-white to light grey. Sand it, drill it and paint it to make a great finish for any installation.

④ **Kleer Cellular PVC Laminating Adhesive**

A two-part structural adhesive. Lower viscosity for enhanced "flow-out."

Requires less clamping pressure for a thin, void-free bond when laminating cellular PVC faces together to create thicker pieces.

220ml cartridges
