

Denali

The Dent-Free, Rust-Free Window Well

INTRODUCING OUR
NEW WELL

Problems with Metal Wells

1 Easily dented and damaged

- Metal can easily be damaged on the job site.
- Increased callbacks and replacement costs.

2 Rust and corrode

- Made of corrosive materials.
- Soil conditions can cause rust and decay.
- Increased need for replacements.

3 Heavy and cumbersome

- The average well weighs over 100 lbs.
- Cumbersome to transport.
- Sharp edges increases injuries.

Metal vs Denali

Denali Saves Time & Money

- Saves time and money
- Greatly reduces callbacks
- Minimizes repairs and warranties
- **Best in industry 10-year warranty**

Benefits of the Denali Well

1 Impact resistant

- Made from high strength composite materials.
- Won't dent or ding.
- Stands up to tough job sites.

2 Won't rust

- Non-corrosive materials.
- Color will not fade.

3 Light weight

- Weighs only 65 lbs. (40 lbs. less than metal).
- Faster installation.
- Easy to transport across job sites.

DESIGNED FOR
**BUILDERS &
CONTRACTORS**

- Saves time and money.
- Greatly reduces callbacks.
- Minimizes repairs and warranties.
- Best in industry 10-year warranty.
- Reduces injuries-no sharp edges.
- IRC Code Compliant.
