

2022 Trends and New Products

Doors that meet today's home trends.

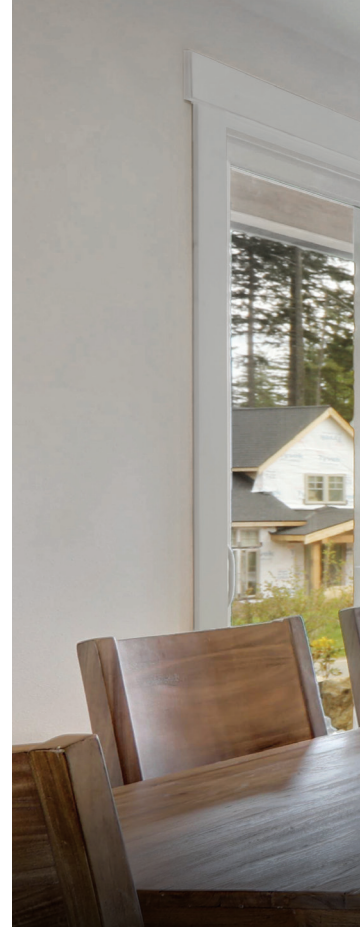

This past year has redefined what it means to be “at home.” Consumers are interacting with their spaces in new ways, seeking flexibility, comfort and a connection to nature. As they interpret architecture through the lens of their own life and style, we'll see more mixing and matching design elements throughout the home in 2022.

Therma-Tru's newest product options deliver functional style to reflect on-trend looks and meet the unique needs of today's homeowners. From casual to traditional to modern, you'll find a range of designs to add personality while making architectural details pop.

CASUAL HAVEN

renewed HISTORY

MODERN REVIVAL

CASUAL HAVEN

The clean and familiar roots of casual design continue to provide comfort, turning the home into a welcome retreat. Creating a calming environment with nature-inspired textures and materials and an abundance of natural light has never been so important. The entryway is a natural extension of these attributes, as homeowners look to achieve a seamless transition between indoors and out.

Simplified

Serene

Gentle

Warm minimalism continues
with a focus on simplicity, rustic
elements and relaxation.

FEATURED PRODUCTS

Clean and familiar
designs create a calming
oasis, inside and out.

A wide range of new door styles, sidelites and glass options for our Classic Craft®, Fiber-Classic® and Smooth-Star® collections give homeowners more ways to liven up the entryway and welcome natural light for a more inviting appearance.

renewed HISTORY

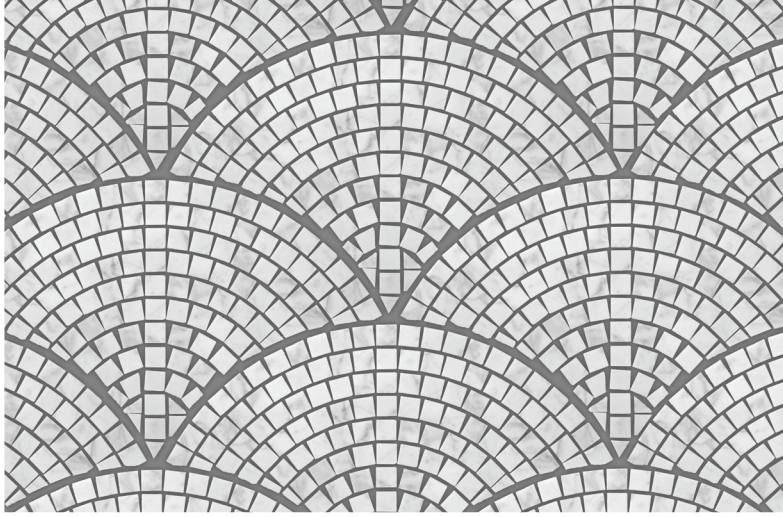

Traditional design continues to evolve, as today's consumers become more comfortable mixing styles for added flexibility. There's a growing desire to return to the dressed-up home, but with a fresh look, incorporating elevated aesthetics and refined takes on the classics. Graceful details like curves and arches add an elegant, inviting touch that draws homeowners in.

Traditional balances
comfort with new
dressed-up accents.

FEATURED PRODUCTS

Classic architecture infused
with fresh energy for an
elevated look.

Mahogany-grained common arch doors for the Classic Craft® Founders Collection™ and Smooth-Star® door styles create the perfect statement-making entry for traditional homes. Complete the look with new decorative glass options that accentuate historic roots.

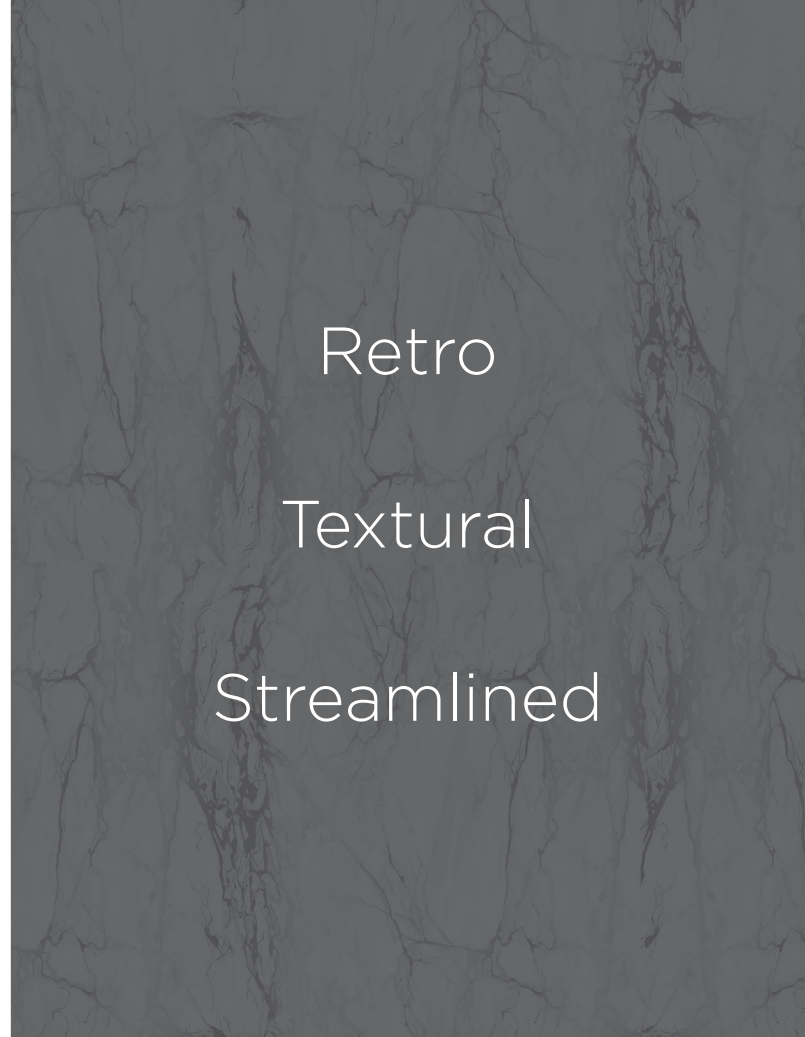

MODERN REVIVAL

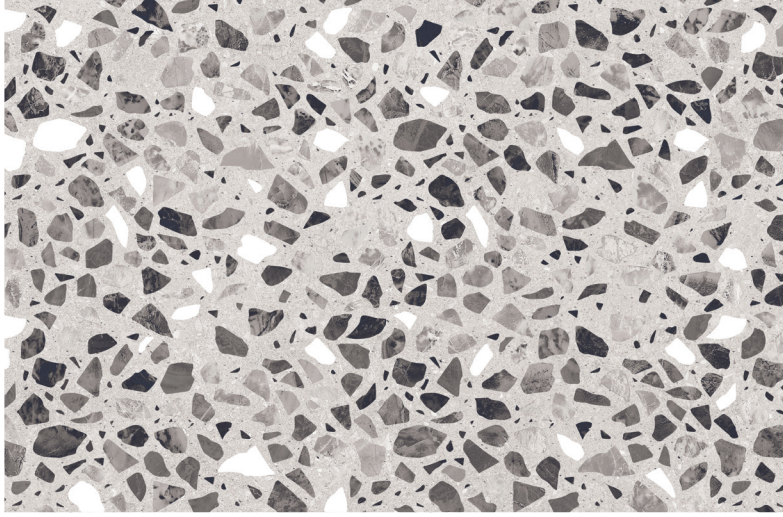

Modern design continues to prioritize a connection with nature to open up the home—but a new wave of nostalgia has brought about fresh looks that nod to the past, from Mid-Century Modern to '70s retro. Hints of eclectic design and material mixing come together to create a warm, textural aesthetic. As homeowners look to bring asymmetrical elements from the indoors out, the front entry makes the perfect focal point.

A wave of interest in
nostalgia brings broader
retro design in step with
soft modern.

FEATURED PRODUCTS

Fresh looks and retro design elements come together for a softer take on modern.

Part of the Classic Craft® Visionary Collection™, Mahogany-grained doors with Zaha® decorative glass create a bold, high-energy look, while Walnut-grained flush doors walk the line between retro and contemporary. Plus, new glass options and direct set sidelites allow you to add stylish detail while balancing the amount of preferred light and privacy.
